

Assistant Head of Research and Development

Jurox is a 100% Australian owned Animal Health Company. Our products are sold to veterinarians, consumers and rural merchandise outlets in Australia, New Zealand, Asia, Europe and the elsewhere. The Company spends approximately 15% of its revenue on research.

A permanent, fulltime position for an Assistant Head of R&D has opened in our Research and Development department, located in Rutherford in the Hunter Valley of NSW in Australia. The position includes responsibility for research and development of pharmaceutical products, working within and leading teams, which include chemists, veterinarians, animal scientists and marketing personnel. The successful candidate will also manage R&D personnel and report directly to the Head of R&D. Ideal applicants will have a degree in veterinary science and either further research experience or alternate post-graduate qualifications in any discipline. Knowledge of GLP and GCP, experimental design and statistics and demonstrated skills in scientific writing are essential.

This position will suit applicants who wish to develop and apply skills in research management. The remuneration package is negotiable and based upon the candidate's qualifications. Further information about Jurox is available at www.jurox.com.au .

Applications or requests for further information should be sent to Head of Research and Development, 85 Gardiner Road, Rutherford 2320, NSW, Australia or email hr@jurox.com.au .
